

NDT Lab
REPORTING

NDT Lab Reporting Software

*Non-destructive testing report &
documentation management software*

The future of NDT Reporting is in the cloud

www.ndtlabreporting.com

info@ndtlabreporting.com

Features

- It meets the **documentation requirements** regarding the welding testing that includes all important codes and standards (in Europe and USA).
- It **improves** the **productivity** that results in **saving resources** and **time**.
- It is straightforward, **easy to learn** and **agile** in creating reports for NDT.
- It eliminates the effort in assuring the documents **traceability**.
- Instant upload and editing of photographic material.
- Ready to use of **consumable libraries** that are editable while also support insertion.
- Ready to use of **testing procedures** that support all methods.
- It includes all **standards references** that regulate the respective methods of NDT.
- **Welders' statistics** are available.
- NDT **calculations**.
- No set up requirement or need for backup.
- **Accessible** from tablets and computers.

Reports

- **Drawing** and **embedding** photos, blueprints, designs and sketches in your reports is a piece of cake, while they are available for later use.
- Can be easily customized to your needs.
- **Multiple weldings** can be listed in a **single report**.
- Can be cloned.
- A **smart database** for **radiographic sources** calculates their activity since their purchase date.
- Your business name and logo are embeddable in header and footer.
- Your clients can be **granted access** to their reports.
- **Digital signature** support.
- Can be **exported to PDF** and promptly sent via email.
- Clean and uniform work environment and **friendly user interface**.
